Dear Mick,

I am writing to acknowledge and say thank you so much for the kind donations to NBUK made by pupils, parents and staff at West Denton Primary School in memory of Bradley Lowery.

This donation makes a big difference to our charity. We are run by part-time volunteers, with no premises, so our running costs are minimised and around 95% of all money received goes directly into neuroblastoma research projects within the UK.

Last year we were able to fund a further five projects looking into the causes of neuroblastoma and seeking new and more efficient treatments. We need to fund new research continually so that families of a child with neuroblastoma can go forward in the hope that the next research project will produce a breakthrough to overcome this devastating disease.

We completely rely on supporters such as West Denton Primary School to raise the funds we need for our research projects that are trying to help give children life and their families hope. So, on behalf of our charity and all the children who will benefit from your donation, thank you for your support.

Yours sincerely,

Suzanne Clayton
